

Women's History Month March 2023

Presented by Jennifer Hunau

Celebrating Women

Who Tell Our Stories

Why Women's History

We recognize this month in order to:

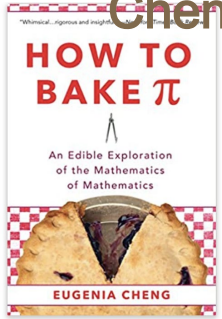

- celebrate women's achievements
- raise awareness about women's equality
- work for accelerated gender parity

Celebrating Women Who Tell our Stories

Amazing women in the field of Scientific Communication, with the goal of bringing scientific literacy, awareness, and science culture to the public.

How the first Black woman to help discover an element 'claimed a seat at the periodic table'

BILLIE JEAN
THE PROFESSIONAL TENNIS PLAYER
The woman who wants equal rights
November 22, 1942

Made by: Zheerita

DID YOU KNOW?

In 1971, Billie Jean was named sports person of the year

She was not allowed in the tennis pro because she did not have a skirt.

Billie Jean did not believe that men were better at sports than women.

When Billie Jean was young she was not always interested in tennis she has interest in other sports but realized only boys were playing that's when her dad recommended tennis and she fell in love with it.

A part of Billie Jean's legacy is she formed a women's tennis association in 1973

SKOLSTREJK FÖR KLIMATET
Greta Thunberg
Climate Change Activist
January 3, 2003 - Present

Accolades

She became famous worldwide for her work trying to avoid Earth's climate crisis. Her challenge was world leaders to limit climate change. She also made many speeches about climate change and soon had this work for stopping it.

Greta's Impact on the World

She became famous worldwide for her work trying to avoid Earth's climate crisis. Her challenge was world leaders to limit climate change. She also made many speeches about climate change and soon had this work for stopping it.

International Women & Girls in Science Day

I see... I think... I wonder...

International Women & Girls in Science Day
GENDER GAP: the discrepancy in opportunities, status, or behavior, more often women.

Why do we think there is a gender gap in STEM?

- people's biases & gender assumptions
- people may think men are 'better' at science
- people may think men are capable of more
- past gender roles still make some people doubt women's abilities
- what they do
- They: men, women, society
