

ENVIRONMENTAL WEEK

April 16-22

Quail Run
Elementary School
Garden

Environmental Week Events

Friday, April 21 - John Muir Day

Saturday, April 22 - Earth Day

NGSS and EPC's: Focus on **Environment**

California's Environmental Principles and Concepts (EPC's)

- California's Environmental Principles and Concepts (EP&Cs) highlight the deep relationship between humans and the natural world.
- These are intended to inform standards-based instruction and fuel student inquiry. Teachers can support environmental literacy by helping students to understand and apply the EP&Cs across academic disciplines and in the real world.
- By law, the EP&Cs must be addressed in future California textbooks and instructional materials adopted by the state.

NGSS and EPC's: Focus on **Environment**

Principle 1 - People Depend on Natural Systems

Principle 2 - People Influence Natural Systems

Principle 3 - Natural Systems Change in Ways that People Benefit From and Can Influence

Principle 4 - There are no Permanent or Impermeable Boundaries that Prevent Matter from Flowing Between Systems

Principle 5 - Decisions Affecting Resources and Natural Systems are Complex and Involve Many Factors

Why do we recognize Environmental Week?

So that our Students:

- become environmentally conscious.
- become stewards of the Earth and its resources.
- learn the impacts of their decisions on the environment.
- implement sustainable practices.
- lead efforts to combat climate change in their communities.
